ABOUT ME

I am a dedicated and passionate cybersecurity professional. My unique background in business ownership and working in the MSP/MSSP field gives me unparalleled experience when considering business aspects, as well as technical, making me a fantastic asset to your organization.

WORK EXPERIENCE

Security Analyst III
2022 - Present
Deepwatch, United Sates

- Participate in training plan development to shape the onboarding process of analysts
- Interface with customers as an SME on the topic of cybersecurity
- Mentor Tier 1 and Tier 2 analysts in proper analysis procedures
- Provide a point of escalation within the squad for more complex incidents
- Expertly triage and handle various alerts from clients, including Fortune 500 companies
- Maintain knowledge of current industry trends and attacks to better mentor and analyze incidents
- Identify opportunities to tune alert logic to reduce alert fatigue within the squad

SOC Analyst II
2021 - 2022
Green Cloud Defense, United States

- Train new Tier 1 and Tier 2 SOC Analysts
- Perform host-based analysis, artifact analysis, network packet analysis and malware analysis in support of security investigations and incident response
- Created SOPs related to daily operation and provide feedback on current processes to maximize efficiency
- Identify, collect, and analyze threat intelligence from internal and external sources
- Investigate, document, and report on information security issues and emerging trends

NOC Technician
2019 - 2020
Imprezzio, United States

- Monitored LogRhythm SIEM and responded to alerts
- Handled creation and termination of Active Directory accounts
- Provided systems support for various building tenants
- Monitored company applications for availability
- Created centralized monitoring stack utilizing Grafana, Prometheus and several available plugins with Docker on CentOS 8
- Automated alerting using Power Automate and Opsgenie
- Interfaced with client IT support to maintain availability of Imprezzio's applications

WORK EXPERIENCE

Chief Executive Officer   2019 - Present

Digital Edge LLC, United States

- Manage IT infrastructure for several local companies
- Configure and maintain cloud deployments of client applications
- Analyze current infrastructure and recommend solutions to clients
- Create security SOPs around business needs and risks
- Perform security posture assessments and report findings with remediation suggestions

Network Engineer   2018 - 2019

ABC Office Equipment, United States

- Managed and maintained all aspects of client Active Directory installations
- Planned and executed on-boarding of clients
- Setup and configured networking for small and medium businesses
- Maintained hardware and network installations on a wide range of equipment and software
- Configured clustering and failover systems to achieve high availability
- Appropriately handled and managed client passwords
- Securely designed and maintained a highly available multi-tenant hardware management suite
